## **DETAILED ACTION**

### ***Election/Restrictions***

1. Claims 3, 3, 17, 28, 37, 40, 58, 67, 68, 76, 81, and 89 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected species, there being no allowable generic or linking claim. Election was made **without** traverse in Paper No. 4.

### ***Claim Rejections - 35 USC § 102***

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1, 2, 4-9, 11-14, 16, 18-25, 33, 35, 36, 38, 39, 41-56, 59-61, 63-66, 69-75, 77-80, 82-88 and 90-92 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Shimizu, 5,827,115. Please refer to column 5, lines 34-67; column 6, lines 10-25 and column 8, lines 60 through column 9, lines 15.

### ***Claim Rejections - 35 USC § 103***

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 10, 15, 26-27, 29-32, 34 and 62 are rejected under 35 U.S.C. 103(a) as being unpatentable over Shimizu, '115 in view of Bruxvoort et al, 5,958,794. '115

Art Unit: 3723

discloses that the tool is dressed, but does not disclose that the dressing is done by a finely tuned laser beam. '794, column 14, lines 13-26, teaches that laser dressing of polishing pads is a conventional technique. It would have been obvious to one of ordinary skill in the art to have provided '115 with the conventional laser dressing taught by '794, ""to remove worn abrasive particles" and/or to remove any undesirable debris and thereby enhance the cutting ability of the fixed abrasive article", column 14, lines 15-18.

### ***Conclusion***

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Other similar polishing systems are cited of interest.
